

Summer internships in investment writing

Do you have excellent writing skills and an interest in financial markets?

We're a copywriting agency specialising in investments. Our HQ is in Glasgow, and we've got offices in Edinburgh, London, the US and Asia. We're expanding all the time and are looking for talented writers who will intern with us during the summer of 2021 – and potentially become future employees.

Our bread and butter is the vital fund reporting and market commentary that keeps our clients' customers informed. Our clients include some of the biggest names in asset management: BlackRock, Columbia Threadneedle, Aberdeen Standard Investments, Old Mutual, HSBC, Investec and Newton.

An internship with us will allow you to hone your writing skills and grow your knowledge of investments and financial markets.

This opportunity might suit you if you're studying economics, business, marketing, English, or modern languages. But if you're from another discipline and want to make your case to us, we'll listen.

We'll mentor you closely over your placement, helping you to gain valuable writing and copy-editing skills, and teaching you the basics of how financial markets work.

By the end of your placement, you should be able to write and edit a fund report, and be confident researching and writing articles about financial markets and investing. You'll learn to write clearly and persuasively, and will have the opportunity to pitch/write articles for our blog. If you're really good, you'll see your content sent out to our clients.

If you're interested in financial markets and in writing about them with clarity, then we are definitely interested in you.

Please email us your CV and a cover letter explaining why you'd benefit from an internship with us.

This placement is paid, and we would like to hear from applicants who can commit to at least eight weeks with us.
